

# 44 x 56 Bulk-Pal® Pallet

The ORBIS 44 x 56 Bulk-Pal stackable pallet is compatible with all palletizers, conveyors and automatic systems. It is designed to convey a variety of industrial products. Its structural foam injection molded construction provides strength, durability, close tolerance, dimensional consistency and stability. The impact-resistant pallet connectors are available in a variety of colors and the patented snap-fit design enables easy on-site repair. The Bulk-Pal pallet is available in FDA approved materials for all types of food and beverage applications with a temperature range of -20°C to 55°C (-4°F to 130°F). This highly conveyable pallet has recessed areas for UPC bar coding.
