

Plastic Divider Sheets Protect Products Throughout the Supply Chain

CORBI Divider Sheets provide maximum product protection and load stability for unitized loads of food, beverage and industrial products. When combined with plastic pallets and top frames, an efficient shipping system is created for storage and transport.

These reusable plastic Divider Sheets are placed between layers of aluminum, steel, glass and plastic cans or bottles used to package food and beverage products. They are also used in many industrial applications to protect items, including printed materials or automotive products.

The non-sloughing, solid plastic design reduces product contamination that can occur from dust, fiber and splinters found in alternative sheet materials. Additionally, Divider Sheets are easily cleanable, using CORBI's proprietary cleaning technologies.

Their reusability eliminates the packaging waste associated with the disposal of corrugated and solid fiberboard divider sheets.

To support high-velocity supply chains, CORBI offers Divider Sheets on a rental basis, through its pooling services. Pooling eliminates the upfront investment of purchasing divider sheets. Additionally, CORBI specializes in managing the complexities of transporting and tracking these pooled products.

Industries:

- ◆ Beverage
- ◆ Food (meat, produce, etc.)
- ◆ Consumer goods
- ◆ Printing
- ◆ Automotive

**Thicknesses from
0.025" to 0.200"
(0.64mm to
5.08mm)**

**Smooth, solid,
non-slip design**

**Available in
custom sizes
and colors.**

Typical Sheet Sizes:

- 44" x 56"
- 40 x 48"
- 44.75" x 47.5"
- 45" x 47.5"
- 1000 x 1200 (mm)
- 1120 x 1300 (mm)
- 1120 x 1420 (mm)
- 1150 x 1250 (mm)
- 1180 x 1250 (mm)
- 1200 x 1350 (mm)

Rounded corners

Consistent dimensions for use with automated systems.

**100% recyclable. Contact your sales
representative about CORBI's Recycling Program.**

**Customer name and other specifications
can be printed on sheets**

CORBI Plastics manufactures and manages pools of plastic reusable packaging products that protect food, beverage and industrial products during processing, storage and distribution. Our broad product offering, combined with pooling and logistics expertise, provides a cost efficient method to move product throughout your entire supply chain. Call CORBI Plastics today to learn more.

Plastic Divider Sheets

Performance characteristics vary with application.

**Solid plastic design
ideal for transporting
all types rigid product.**

Solid Sheet Design:

Extrusion process produces a solid sheet ideal for stabilizing loads of all types of rigid product.

Manufactured in polypropylene (PP)

Available in FDA approved materials, upon request.

2" radius or custom corners

Anti-static

Moisture resistant

Chemical Resistance: Resistant to water based solutions of inorganic salts and almost all inorganic acids and bases

Temperature Range: -25°F to 176°F (-20°C to 80°C) Subject to application characteristics.

Options:

Customer name and other specifications can be printed on sheets

Custom sizes and corner radius

Custom colors
